Looking to program in a game development field

Education

University of Michigan – Ann Arbor

Fall, 2017 – Present

Computer Science Major, Physics Minor

- Cumulative GPA: 3.273
- Honors: Dean's List (1 time), University Honors (1 time)
- STEM Courses
 - Game Design and Development
 - Data Structures & Algorithms
 - Applied Linear Algebra

Phillips Exeter Academy

Fall, 2013 – Spring, 2017

Experience

Filtered

Boston, MA

Software Engineering Contractor

Summer, 2019

- Aided in the deployment of a custom Python Jupyter Notebook server for data science interviews
- Implemented Git submodules to fix version control issues for files shared between repos
- Researched unit testing frameworks and added Jest to the CI
- Resolved JIRA stories for front and back end features following MVC in HTML, CSS, JavaScript, MongoDB
- Became confident in my ability to research, implement, and deploy product improvements and features

MoQuality

Atlanta, GA

Software Engineering Intern

Summer, 2018

- Programmed interactive notification bots for Slack, GitHub, and Pivotal Tracker
- Wrote integrations for the following CI/CDs: CircleCI, fastlane, and bitrise
- Became very comfortable with Python, Docker, Google Cloud, APIs, CI/CDs, and product deployment
- Delivered products on my own and learned about the lifestyle of a startup

Prudential Insurance

Mountain View, CA

Quality Engineering Intern

Summer, 2017

- Programmed feature tests with Angular framework in node.js environment
- Presented successful feature tests to Regional Vice President
- Gained greater knowledge of web development and perspective on quality assurance
